

CONSERVE ENERGY

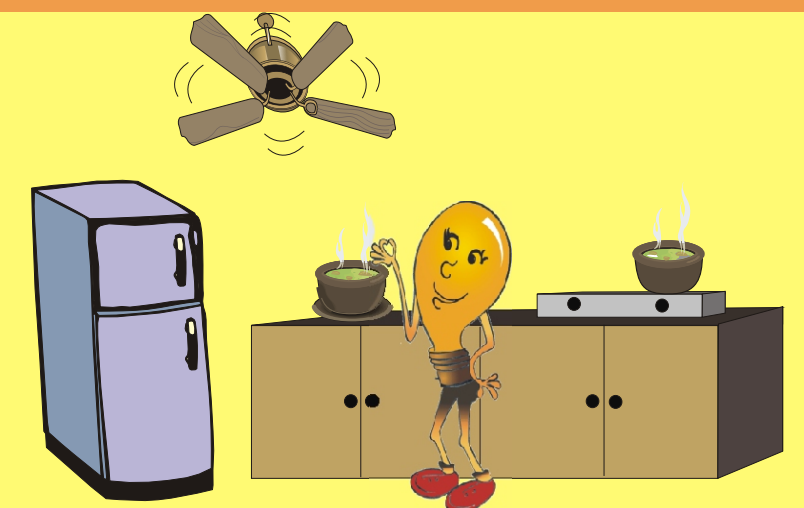

SIMPLE TIPS TO CUT DOWN YOUR ELECTRICITY BILL.

Switch off the light or other electronic appliances when not in use!

Replace ordinary bulbs with CFLs. CFLs use 5 times less electricity than ordinary bulbs and last 10 times longer.

Bring food to room temperature before cooking it or placing them in the refrigerator.

Open and close the refrigerator doors as quickly as possible.

Avoid keeping the freezer empty. It works more efficiently when full, than when nearly empty.

Iron a pile of clothes at one go, instead of one or two at a time.

BEACON

Building Energy Awareness on Conservation, School Education Programme, 2006 & 07

Executing Agency

Bureau of Energy Efficiency
Ministry of Power, Government of India
Website: www.bee-india.nic.in

Implementing Agency

The Energy and Resources Institute
